Quality

MyHome è il marchio di arredamento che nasce nel 2015 dall'esperienza della "famiglia" Alivar, nel distretto produttivo toscano tra Firenze e Siena, dove l'arte del saper fare artigiano nei settori della carpenteria, della sartoria e della lavorazione della pelle affondano le proprie radici. La collezione di arredi MyHome è dedicata ad ambienti residenziali e contract ed è rivolta a un pubblico giovane e attento alle nuove tendenze del design contemporaneo e alla qualità tutta italiana della manifattura. Ogni prodotto racconta perciò una storia, fatta di artigianato, saper fare, amore per il dettaglio e ricerca continua di soluzioni che si adattino all'evoluzione tecnologica nel campo produttivo.

Tutti i prodotti realizzati da MyHome restituiscono il concetto di Made and Manufactured in Italy, infatti tutto il processo creativo e produttivo è interamente realizzato in Italia da professionisti e da personale qualificato e dotato di competenza nel settore del mobile. La produzione artigiana del Made in Italy supera la logica del prodotto standardizzato e per questo garantisce un elevato livello di personalizzazione del prodotto. La qualità dei prodotti è garantita dall'attenzione sartoriale dei maestri artigiani, nella cura del dettaglio, nella scelta dei materiali e delle finiture; qualità progettuale, nella disponibilità alla personalizzazione, nella gestione dei piccoli lotti e nella stretta relazione con i fornitori. MyHome Collection è azienda certificata 100% Made In Italy ed è stata iscritta nel registro Nazionale dei Produttori Italiani. Il marchio 100% Made In Italy certifica che la fabbricazione del prodotto è interamente italiana, i semilavorati sono prodotti esclusivamente in Italia, sono utilizzate solo materie prime e componenti italiani di pregio e qualità selezionata di prima scelta. La lavorazione è tipica della tradizione italiana. L'intero processo di lavorazione aziendale è garantito con certificazione 100% Made in Italy rilasciata dall'Ente Produttori Italiani Certificato N° IT01.IT_532.091.M.

MyHome is a furniture trademark created in 2015, based on the experience of the Alivar "family". It is located in the Tuscan production district between Florence and Siena, renowned for skilled craftsmanship in the fields of metalwork, tailoring and leatherworking. The MyHome collection of furnishings for residential and contract applications is aimed to a young audience interested in new contemporary design trends and the exceptional quality of Italian craftsmanship. Every product tells a story made of skills, know-how, attention to detail and constant research on solutions that adapt to technological evolution of production methods.

All the products made by MyHome epitomize the concept of Made and Manufactured in Italy. In fact, the entire process of their creation and production takes place in Italy, carried out by professionals and qualified staff with extensive experience in the furniture sector. The workmanship of Made in Italy goes beyond the logic of the standardized product, and thus ensures high levels of personalization for every item. The quality of the products is guaranteed by the sartorial skills of master craftsmen, based on painstaking attention to detail and careful selection of materials and finishes, excellent design, a wide variety of options for personalization, adapting to small production runs in close collaboration with suppliers. MyHome Collection is certified as 100% Made in Italy and listed in the National Registry of Italian Manufacturers. The 100% Made in Italy certification guarantees that products are entirely manufactured in Italy, using semi-finished products exclusively of Italian origin, as well as the finest Italian raw materials and components. The workmanship is based on the best aspects of the Italian tradition. The entire in-house production process is covered by the 100% Made in Italy Certificate issued by Italian Producers Corporation Certificate N° IT01.IT_532.091.M.

 Ø 100 H 72
 Ø 39,4" H 28,3"

Poltrona disponibile anche con basamento girevole a 360°. Base in multistrato di abete rivestita in vellutino accoppiato e tessuto. Struttura in legno di abete. Seduta e schienale ricoperti in poliuretano indeformabile a densità differenziata e dacron e fodera in fibra di poliestere. Rivestimento in tessuto. La lavorazione del cuscino seduta è arricchita da impunture per valorizzarne la morbidezza estetica.

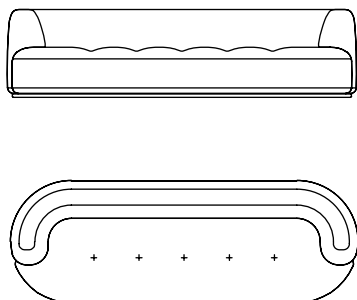

Armchair available also with a 360° swivel base. Base in fir plywood covered with fiber wadding and fabric. Structure in fir wood. Seat and back upholstered with non-deformable polyurethane foam of different densities, dacron and polyester fiber lining. Fabric cover. The seat cushion is enriched with stitching to enhance its aesthetic softness.

Fauteuil disponible aussi avec base pivotante à 360°. Base en sapin stratifié recouvert avec garniture en fibre et tissu. Structure en bois de sapin. Assise et dossier recouverts de polyuréthane indéformable à plusieurs densités, dacron et housse en fibre de polyester. Revêtement en tissu. Le coussin d'assise est enrichi par couture pour renforcer sa douceur esthétique.

Sillón disponible también con base giratoria de 360°. Base de madera contrachapada de abeto revestida con terciopelo acoplado y tejido. Estructura de madera de abeto. Asiento y respaldo revestidos en poliuretano indeformable a densidad diferenciada, dacron y funda en fibra de poliéster. Revestimiento en tejido. La elaboración del cojín del asiento se enriquece con pespuntos para realzar su suavidad estética.

Poltrona con piedi in acciaio a taglio laser verniciato. Struttura in multistrato di abete rivestita in vellutino accoppiato e tessuto. Seduta e schienale ricoperti in poliuretano indeformabile a densità differenziata, dacron e fodera in fibra di poliestere. Rivestimento in tessuto. La lavorazione del cuscino seduta è arricchita da impunture per valorizzarne la morbidezza estetica. Disponibile anche con basamento girevole a 360°.

Armchair with lacquered laser cut steel feet. Frame in fir plywood covered with fiber wadding and fabric. Seat and back upholstered with non-deformable polyurethane foam of different densities, dacron and polyester fiber lining. Fabric cover. The seat cushion is enriched with stitching to enhance its aesthetic softness. Available also with a 360° swivel base.

Fauteuil avec pieds en acier coupé au laser verni. Structure en sapin stratifié recouvert avec garniture en fibre et tissu. Assise et dossier recouverts de polyurethane indéformable à plusieurs densités, dacron et housse en fibre de polyester. Revêtement en tissu. Le coussin d'assise est enrichi par coutures pour renforcer sa douceur esthétique. Disponible aussi avec base pivotante à 360°.

Sillón con pies de acero cortado a laser barnizado. Estructura de madera contrachapada de abeto revestida con terciopelo acoplado y tejido. Asiento y respaldo revestidos en poliuretano indeformable a densidad diferenciada, dacron y funda en fibra de poliéster. Revestimiento en tejido. La elaboración del cojín del asiento se enriquece con pespuntos para realzar su suavidad estética. Disponible también con base giratoria de 360°.

CONDIZIONI GENERALI DI VENDITA

La vendita dei prodotti di cui al presente listino è regolata dalle Condizioni generali di vendita o di distribuzione relative al rapporto tra il cliente e MyHome. È onere del cliente prendere attenta visione delle condizioni di vendita o di distribuzione applicabili al rapporto tra il cliente e MyHome.

AVVERTENZA.

I termini e le condizioni di vendita qui riportati costituiscono un mero estratto delle principali condizioni applicabili alle vendite dei prodotti di MyHome. L'emissione di ordini di acquisto nei confronti di MyHome comporterà la conoscenza ed applicazione delle stesse. L'unica disciplina legale del rapporto è contenuta nelle Condizioni generali di vendita o di distribuzione sopra citate.

Prezzi : Le quotazioni all'interno del listino sono espresse in Euro.

IVA. I prezzi del presente listino si intendono prezzi al pubblico consigliati.

Efficacia del listino, variazioni. Il presente listino non costituisce offerta al pubblico, ma mero invito a proporre rivolto al cliente. MyHome potrà apportare in qualunque momento modifiche e variazioni ai prodotti, ai materiali e alle finiture dei prodotti, ai loro disegni ovvero ai prezzi di cui al presente listino. Il presente listino annulla e sostituisce ogni listino di data anteriore. MyHome si riserva di pubblicare in ogni momento nuovi listini.

Dimensioni modelli. Le dimensioni indicate nel seguente listino sono in centimetri e pollici. I prodotti di MyHome sono lavorati artigianalmente. Sono dunque possibili variazioni dimensionali del prodotto reale di +/-2% rispetto alle dimensioni indicate nel presente listino.

Rivestimenti, prodotti naturali e altri materiali. Le tonalità di colore dei tessuti, delle pelli, del legno e delle laccature possono subire delle variazioni a seconda del bagno di colore, pertanto l'azienda non si assume responsabilità per eventuali differenze di colore e nell'accompagnamento di elementi in aggiunta. L'azienda non può garantire inoltre la perfetta corrispondenza di colore fra il campionario ed i prodotti forniti. Alcune peculiarità (elencate qui sotto) dei prodotti naturali, sono da considerarsi non difetti ma caratteristiche di genuinità, pregio e unicità del materiale. Infatti ogni pezzo è unico, non esistono due pezzi uguali:

- imperfezioni, cicatrici, grana più o meno evidente della pelle
- venature del legno più o meno accentuate
- venature, cavilli, porosità e differenza di lucentezza del marmo

Rivestimenti in pelle. Le caratteristiche della pelle, impiegata da MyHome nei propri rivestimenti, sono simbolo e segno della qualità superiore della materia. Le piccole imperfezioni, come punture d'insetti, cicatrici, striature, rugosità o anche una leggera variazione cromatica e di lucentezza sono, infatti, sinonimo, sulle pelli MyHome, di mancanza di coperture sintetiche che ne altererebbero la naturale bellezza e diminuirebbero la traspirazione.

AVVERTENZA: MyHome declina ogni responsabilità per danni causati dalla migrazione del colore di contaminanti esterni contenuti in alcuni capi d'abbigliamento e/o accessori sul rivestimento in MyHome. La garanzia del produttore non copre in nessun caso i danni causati da trasferimento colore da oggetti e/o tessuti venuti a contatto con il rivestimento.

Rivestimento fornito dal cliente. Il cliente deve preventivamente inviare a MyHome, all'attenzione della corrispondente commerciale di riferimento, un campione di cm 30x30 del tessuto prescelto. Il quantitativo di tessuto, determinato in base al metraggio indicato a listino, deve essere recapitato a MyHome franco di ogni spesa. I metraggi indicati in listino si riferiscono a tessuti con altezza di cm 140. Il tempo di consegna di un ordine con tessuto/pelle cliente dipende dalla data di ricevimento del tessuto/pelle cliente da parte di MyHome e viene comunicato dal Customer Service tramite l'invio della conferma d'ordine.

Omologazione Classe 1IM. La realizzazione di modelli conformi alle norme sulla prevenzione incendi, vigenti in materia di sicurezza per i locali di spettacolo e di intrattenimento (classe 1IM), è subordinata a quantitativi minimi di ordine e quotazioni che dovranno essere preventivamente richiesti a MyHome. La fattibilità per ogni singolo prodotto (o modello) deve essere preventivamente verificata con MyHome.

Modelli. Tutti i modelli registrati o non registrati, nonché il diritto d'autore sugli stessi, sono di titolarità di MyHome ovvero concessi in licenza esclusiva.

Ne è vietata la riproduzione, l'elaborazione e qualunque altra forma di sfruttamento economico senza la preventiva autorizzazione scritta di MyHome.

Evasione ordini. L'ordine d'acquisto inoltrato dal cliente diventa vincolante solo al momento della ricezione della conferma d'ordine scritta da parte di MyHome. Dopo la ricezione della conferma d'ordine, la quantità e il tipo di prodotti ordinati, le finiture, il prezzo, gli sconti ed ogni altro elemento dell'ordine confermato non potranno essere modificati se non previo consenso scritto di MyHome.

Termini di consegna. I termini di consegna, ivi compresi quelli indicati nella conferma d'ordine, sono meramente indicativi e non vincolanti per MyHome. Nessun inadempimento sarà imputabile a MyHome, e nessun risarcimento del danno sarà dovuto, per consegne oltre il termine indicato da MyHome.

Spedizione dei prodotti. Quando non diversamente pattuito, i costi di spedizione e assicurazione nonché il rischio di danneggiamento o perimento dei prodotti durante il trasporto sono a carico del cliente. La consegna dei prodotti da MyHome al cliente si intende effettuata quando gli stessi sono presi in carico dal vettore o dallo spedizioniere.

I prodotti saranno spediti esclusivamente al cliente ordinante, presso i propri magazzini o spazi commerciali. MyHome non spedisce i prodotti a terzi diversi dal cliente ordinante.

Reclami a seguito di danni da trasporto. È onere del cliente verificare lo stato dei prodotti e degli imballaggi al momento della consegna dell'ordine. Nel caso in cui i colli e/o gli imballaggi risultassero danneggiati, è onere del cliente accettare la consegna indicando sulla lettera di vettura la dicitura "con riserva di controllo" nonché la specificazione dei danni ai prodotti e/o all'imballaggio che appaiano visibili al momento del ricevimento. Se i prodotti e/o gli imballaggi riportano danni o sono periti durante il trasporto, il cliente deve segnalare tale occorrenza a MyHome nel termine perentorio di 3 (tre) giorni dalla consegna, a pena di decadenza.

È richiesto il controllo dell'integrità dei piani di vetro / marmo all'atto della consegna, poiché non potranno essere accettati reclami successivi.

L'azienda non risponde per danni dovuti ad uso improprio e/o mancanza di cura o manomissione del prodotto, quali:

- Rotture o danni occorsi nel magazzino del cliente.
- Danni a tessuti o pellami dovuti ad un'apertura non corretta degli imballi (es. tessuti o pelli tagliati).

Reclami per vizi dei prodotti. Il cliente può denunciare eventuali vizi dei prodotti secondo quanto previsto dal Codice Civile, inviando comunicazione a MyHome entro 8 (otto) giorni dalla scoperta del vizio, a pena di decadenza, e comunque nel termine di prescrizione 1 (un) anno dalla consegna.

Destinazione d'uso dei prodotti e garanzia. In qualità di produttore, MyHome deve assicurare l'immissione nel mercato di prodotti sicuri e conformi alle norme. A tal fine, MyHome garantisce che i prodotti venduti sono conformi alle norme del paese di stabilimento del cliente, per un uso residenziale. Qualora il cliente intenda destinare i prodotti all'uso in un paese diverso rispetto a quello del proprio stabilimento (es. prodotti acquistati da un cliente italiano per la rivendita nel Regno Unito), oppure ad un uso diverso da quello residenziale (es. locali pubblici, teatri, cinema, ecc.), è onere del cliente indicare a MyHome il paese di destinazione del prodotto e/o la circostanza che il prodotto sarà impiegato in ambiente non residenziale, per consentire a MyHome di fabbricare un prodotto conforme alle norme applicabili nel paese di destinazione, immettendo nel mercato un prodotto sicuro. L'indicazione deve essere inoltrata dal cliente a MyHome prima dell'emissione dell'ordine d'acquisto.

MyHome potrà rifiutare di prendere in carico ordini per prodotti che non possono essere resi conformi alle norme applicabili nel paese di destinazione.

Riserva di proprietà, decadenza dal beneficio del termine, interessi. Salvo patto contrario, la vendita si intende effettuata con riserva della proprietà e pertanto la proprietà dei prodotti passerà al cliente a seguito del pagamento dell'intero prezzo. Il cliente assume tuttavia i rischi dal momento della consegna.

In caso di pagamento a rate, il mancato pagamento di una o più rate del prezzo pattuito comporterà l'immediata decadenza del debitore dal beneficio del termine, con conseguente diritto del produttore di ottenere l'immediato saldo del proprio intero credito e di sospendere le forniture in corso, anche se non riferite ai pagamenti non effettuati; in ogni caso MyHome potrà agire per il recupero delle rate scadute e non pagate. In caso di risoluzione del contratto per l'inadempimento del cliente, le rate pagate resteranno acquisite al produttore, a titolo di risarcimento del danno e salvo il risarcimento del danno ulteriore. In caso di ritardo nel pagamento, saranno applicati automaticamente gli interessi di mora al tasso legale vigente.

GENERAL TRADING TERMS AND CONDITIONS

The sale of the products on this price list is governed by the general conditions of sale or distribution governing the relationship between the client and MyHome. It is the client's responsibility to ensure that they have read the general conditions of sale or distribution that apply to the relationship between the client and MyHome.

WARNING The terms and conditions shown here constitute a mere extract of the main conditions applicable to the sale of MyHome products. Forwarding purchase orders to MyHome implies familiarity with and application of the said conditions.

The only legal framework for the relationship is contained in the aforementioned general conditions of sale or distribution.

Pricing. The prices quoted in the price list are in euro.

VAT. The prices quoted in this price list are the recommended selling prices.

Effectiveness of the price list, changes. This price list does not constitute a public offer, but merely an invitation to a client to make an offer.

MyHome may make modifications and changes to the products, materials and product finishings, to their design or to the prices indicated in this price list at any time. This price list cancels and replaces all earlier price lists.

MyHome reserves the right to publish new price lists at any time.

Model sizes. The sizes indicated in this price list are in centimetres and inches. MyHome products are manufactured by hand. Therefore, the size of the actual product may vary by +/-2% compared to the sizes indicated on the price list.

Covers, natural products and other materials. The shade of colour of the fabrics, leathers, wood and lacquer may be subject to variation according to the colour bath solution used, therefore the company will not accept any liability for any colour variations or differences in the additives used. The company is furthermore unable to guarantee that the sample swatch colours and the colour of the actual products supplied will perfectly match. Certain particular features of natural products (below listed) are to be considered not defects but characteristics of genuineness and authenticity of the material. Each piece is unique, no two pieces are ever the same :

- Any leather imperfections, marks or grain, evident to a lesser or greater extent
- Wood veining evident to a lesser or greater extent
- The veining, little fissures, porosity and difference in the degree of marble shine

Leather upholstery. The characteristics of the leather, the only leather used by MyHome for its upholstery, are a symbol and a guarantee of the superior quality of the material. Small imperfections, such as insect bites, scarring, ridging, roughness, or even slight variations of the colours or the shine, for MyHome are emblematic of the fact that its upholstery is not coated with any synthetic substances that would affect their natural beauty and reduce the hide's transpiration.

WARNING: My Home accepts no responsibility for any damage caused by the contamination or transfer of agents found in clothing or accessories on to MyHome leather upholstery. The manufacturer's warranty does not cover damages caused by colour transfer from fabric or objects which come into contact with the upholstery.

Upholstery with fabric/leather provided by the client (C.O.M./C.O.L). The client must send My Home, FAO the reference sales contact, a sample of the selected fabric measuring 30 cm x 30 cm. The quantity of fabric, determined based on the price per metre shown on the price list, must be delivered to MyHome free of charge. The prices per meter shown on the price list refer to fabrics with a width of 140 cm. The delivery time of an order with client fabric/leather depends on the date of receipt of the client fabric/leather by MyHome and will be communicated by Customer Services through the sending of an order confirmation.

Class 1IM Fire Reaction Certification. The manufacturing of items that comply with the regulations in force concerning fire prevention in entertainment and exhibition places depends on minimum quantities and the corresponding prices will have to be requested to MyHome. MyHome reserves to verify the feasibility of every product and item.

Models. All patented or unpatented models, as well as all intellectual property rights related to them, are owned by MyHome or subject to an exclusive licence granted to MyHome. Reproduction, modification or any other form of economic exploitation of such models without prior authorisation in writing from MyHome is forbidden.

Fulfilment of orders. Purchase orders sent by the client become binding only on receipt of a written order confirmation from MyHome. After receipt of the order confirmation, the quantities and types of product ordered, the finishings, price, discounts and any other element of the confirmed order may not be modified without approval in writing from MyHome.

Delivery times. The delivery times, including those indicated on the order confirmation, are purely indicative and in no way binding for MyHome. MyHomewill have been guilty of no breach, nor owe any compensation, for deliveries after the time indicated by MyHome.

Shipping of the products. Unless otherwise agreed, the shipping and insurance costs, as well as the risk of damage or deterioration of products during transport shall be borne by the client. The products will be considered delivered by MyHome to the client when accepted by the carrier or shipping company. The products will be only be sent to the client who placed the order, to its warehouses or commercial premises. MyHome does not ship products to third parties other than the client who placed the order.

Claims resulting from products damaged during shipping. It is the responsibility of the client to check the condition of the products and packaging when taking delivery of the order. Should the boxes and/or packaging be damaged, the client must accept delivery, writing the words "subject to check" on the waybill, as well as details of the damage to the products and/or packaging that are apparent at the time of receipt. If the products and/or packaging are damaged or deteriorated during shipping, the client must inform MyHome within the mandatory period of 3 (three) days of receipt, under penalty of forfeiture.

It is strictly requested to check the integrity of the glass/ marble tops upon delivery as no further complaints will be accepted. The company is not liable for complaints due to improper or faulty use of the product, such as:

- Damages occurred in the customer's warehouse
- Damages to leather or fabric covers caused by wrong opening of the packages (such as cuts in leathers or fabrics, etc.).

Claims for faulty products. The client may report any faults found in the products in accordance with the provisions of the Italian Civil Code, by notifying MyHome within 8 (eight) days from the time the fault was noted, under penalty of forfeiture, and, in any event, within the prescribed period of 1 (one) year of receipt.

Intended use of the products. As a manufacturer, MyHome must ensure that the products it places on the market are safe and comply with standards. To this end, MyHome guarantees that the products sold are compliant with standards in the country where the client's establishment is located, for residential use. Should the client intend to use the products in a country other than that where its establishment is located (e.g. products purchased by an italian client for resale in the United Kingdom), or for a use other than residential (e.g. public premises, theatres, cinemas etc.), it is the client's responsibility to provide MyHome with the indication of the country where the products are to be marketed and/or of the non-residential circumstances in which the products are to be used, to enable MyHome to manufacture a product that complies with applicable standards in the destination country and ensure that a safe product is brought to market. The client must provide MyHome with this information before the purchase order is issued. MyHome may refuse to accept orders for products that cannot be made to comply with the standards applicable in the destination country.

Reservation of title, operation of the acceleration clause, interest. Unless otherwise agreed, the sale is understood to have taken place with reservation of title and as a result the ownership of the products will only pass over to the client following payment of the full price. However, all risks will be assumed by the client on receipt. In the case of payment by instalment, failure to pay one or more of the instalments of the agreed price shall result in the debtor forfeiting the benefit of the credit terms, with the manufacturer thus reserving the right to request full payment of the remaining balance immediately and to suspend active orders, even if not related to the payment in question; in any case the manufacturer may take action to recover instalments unpaid by their due date. Should the contract be cancelled following the client's failure to meet payments, those instalments already paid shall be retained by the manufacturer as compensation for damage suffered without prejudicing its right to further compensation for any additional damages.

In the event of a delay in payment, late payment interest will automatically be applied at the current legal rate.

CURA E MANUTENZIONE.

TESSUTO

Per la composizione, manutenzione e pulizia del tessuto, si prega di fare riferimento alla Scheda Tessuti o all'etichetta riportata sul prodotto.

Attenzione, nell'utilizzo dei prodotti di pulizia e manutenzione del tessuto attenersi sempre scrupolosamente alle istruzioni indicate sulla confezione. Per i tessuti lavabili in acqua, si raccomanda il lavaggio presso lavanderie specializzate. Non utilizzare mai alcool o altri solventi. Evitare il contatto diretto del tessuto con fonti di calore, mantenendo il prodotto ad una distanza minima di 20-30 cm. Tutti i materiali, anche i migliori, possono subire variazioni di colore, in particolare se irradiati dalla luce solare. Si sconsiglia l'esposizione diretta alla luce solare. Attenzione. A parità di uso, il tessuto che riveste superfici morbide, è sottoposto ad un'azione di usura maggiore rispetto allo stesso tessuto che riveste superfici rigide.

Avvertenza: per la sua natura e per il trattamento subito, il tessuto non consente sempre l'eliminazione completa di alcune macchie.

PELLE

Per mantenere intatto nel tempo il rivestimento in pelle possono essere effettuate regolarmente delle operazioni di pulizia e manutenzione. Pulire regolarmente con acqua e sapone neutro e stendere in maniera uniforme su tutta la superficie in pelle della crema nutriente, in quanto la crema satura la pelle ritardando l'assorbimento delle macchie. Non usare stracci in microfibra perché rimuovono il grasso e possono danneggiare la pelle. Consigliamo di usare la crema nutriente una o due volte all'anno (ogni volta che la pelle risulta secca). Per rimuovere eventuali macchie usare un panno di cotone. Non strofinare. Premere un panno contro la macchia per assorbire. Usare un detergente delicato sciolto nell'acqua per rimuovere eventuali aloni.

CUSCINI IN PIUMA

Per una normale manutenzione dei cuscini in piuma, si consiglia di batterli energicamente in modo che le piume si ridistribuiscono in maniera uniforme all'interno della fodera, così da ottenere nuovamente il comfort originario.

MARMO

Ogni pezzo di marmo è unico, non esistono due pezzi uguali. Il marmo comunque richiede una ragionevole cura per proteggerlo dalle macchie.

Il marmo è un tipo di pietra calcarea molto compatta e perciò molto porosa; è soggetto a macchiarsi con cibi, liquidi versati e altri materiali di pulizia, specialmente se vengono lasciati per un lungo periodo sulla superficie. Liquidi o altre sostanze anche solo leggermente acide possono corrodere, scolorire o danneggiare in altro modo il marmo. La chiave per vivere con ogni superficie di marmo è di curarla come si farebbe con il legno. In breve, proteggerlo dal calore e da materiali che possono macchiare o graffiare la superficie. Usare tovaglie e sottobicchieri e pulire tempestivamente in caso di macchie.

Le superfici dei piani in marmo sono lucidate (lucido naturale). Ogni marmo viene trattato con cere protettive, ma tali prodotti non rendono mai il marmo impenetrabile da sostanze aggressive e corrosive. Il miglior modo per mantenere l'aspetto di ogni superficie di marmo è rinnovarlo ogni tanto con uno strato di liquido da noi fornito. Sono da evitare per la pulizia del marmo panni con fibre rigide che potrebbero danneggiare le superfici.

ATTENZIONE: il trattamento protettivo non preserva il marmo dalla corrosione acida, pertanto, si consiglia di rimuovere immediatamente i versamenti di sostanze acide quali: limone, aceto, vino, caffè ecc. Evitare di pulire la superficie con prodotti abrasivi e aggressivi ed è sconsigliato l'impiego di detergenti acidi. Il marmo essendo una pietra naturale può presentare delle diversità cromatiche e di venatura le quali rendono ogni modello unico e inimitabile e pertanto differente da tutti gli altri.

LEGNO

Per una normale pulizia delle parti in legno, si consiglia di utilizzare un panno umido e morbido, se necessario leggermente imbevuto di una soluzione composta da acqua e sapone neutro. Asciugare successivamente con un panno morbido ed asciutto. Per una pulizia più approfondita delle parti in legno, è possibile utilizzare i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente.

Si consiglia di testare precedentemente il prodotto in una zona non a vista. Non utilizzare mai alcool o altri solventi. Non impiegare mai prodotti abrasivi o corrosivi. Evitare il contatto diretto del legno con fonti di calore, mantenendo il prodotto ad una distanza minima di 20-30 cm. Evitare la luce diretta del sole.

PARTI IN LEGNO VERNICIATE

Per una normale pulizia delle parti di legno verniciate, si consiglia pulire esclusivamente con panno morbido inumidito con acqua e asciugare accuratamente. Non strofinare energicamente perché la lucentezza della vernice potrebbe alterarsi. Si consiglia di pulire il mobile seguendo sempre il verso delle venature. Per una pulizia più approfondita delle parti di legno verniciate, è possibile utilizzare i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente. Si consiglia di testare prima il prodotto in una zona non a vista. Non utilizzare prodotti contenenti alcool, acetone, cloro, diluenti o detersivi abrasivi. Non collocare i mobili in esterno e non esporli alla luce diretta del sole, poiché le superfici verniciate possono essere irrimediabilmente danneggiate. Non esporre i mobili alle intemperie o a forti sbalzi di temperatura per evitare deformazioni, ritiri e rigonfiamenti indesiderati del legno. Non collocare i mobili in ambienti dal tasso di umidità elevato e porre i mobili lontano da fonti di calore dirette mantenendo il prodotto a una distanza minima di 20-30 cm. e da pareti umide per evitare la formazione di muffe e funghi oppure deformazioni, ritiri e rigonfiamenti indesiderati del legno. Evitare la luce diretta del sole. Non appoggiare sulle superfici del mobile oggetti con superfici eccessivamente calde (oltre i 28°C) e/o fredde (meno di 10°C) per evitare la velatura delle vernici che rifiniscono il mobile. Non colpire le superfici dei mobili con oggetti contundenti o lasciarvi cadere oggetti pesanti e non appoggiarvi oggetti con superfici abrasive, per evitare danni irrimediabili alle superfici di legno.

AVVERTENZA: per la sua natura e per il trattamento subito, il legno non consente sempre l'eliminazione completa di alcune macchie. Un lieve cambio di colore, nel tempo, è da considerarsi come naturale evoluzione del materiale.

PARTI LACCATE

Per una normale pulizia delle parti laccate si consiglia di utilizzare un panno umido e morbido, se necessario leggermente imbevuto di una soluzione composta da acqua e sapone neutro. Asciugare successivamente con un panno morbido ed asciutto. È possibile che per le prime pulizie il panno di pulizia rimanga leggermente colorato, il fatto è dovuto alla presenza di polveri di vernici in superficie. Non utilizzare prodotti e detersivi abrasivi, acetone, trielina, ammoniaca, cera o lucidi per mobili. Non usare panni realizzati con fibre rigide (lini e sintetici) che potrebbero rovinare e/o graffiare le superfici. Per una pulizia più approfondita di queste parti, è possibile utilizzare

i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente. Si consiglia di testare precedentemente il prodotto in una zona non a vista. Tutte queste operazioni devono essere effettuate con molta attenzione per non rovinare le superfici. L'esposizione alla luce diretta del sole può alterare il colore della laccatura o della verniciatura.

PARTI METALLICHE E PARTI VERNICIATE

Per una normale pulizia delle parti metalliche e delle parti verniciate, si consiglia di utilizzare un panno umido e morbido, se necessario leggermente

imbevuto di una soluzione composta di acqua e sapone neutro.

Asciugare successivamente con un panno morbido e asciutto. Per una pulizia più approfondita di queste parti, è possibile utilizzare i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente. Prima dell'uso si consiglia di testare il prodotto su una zona non a vista. Non utilizzare mai alcool o altri solventi. Non impiegare mai prodotti abrasivi o corrosivi.

PARTI CON FINITURA CROMATA

Per una normale pulizia delle parti con finitura cromata, si consiglia di utilizzare un panno umido e morbido, se necessario leggermente imbevuto di una soluzione composta da acqua e sapone neutro. Asciugare successivamente con un panno morbido ed asciutto. Per una pulizia più approfondita di queste parti, è possibile utilizzare i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente. Prima dell'uso si consiglia di testare il prodotto su una zona non a vista. Non utilizzare mai alcool o altri solventi. Non impiegare mai prodotti abrasivi o corrosivi.

SPECCHIO

Per una normale pulizia dello specchio, si consiglia di utilizzare un panno umido e morbido. Asciugare successivamente con un panno morbido ed asciutto. Per una pulizia più approfondita, è possibile utilizzare i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente. Non utilizzare mai alcool o altri solventi. Non impiegare mai prodotti abrasivi o corrosivi.

VETRO

Per una normale pulizia delle parti in vetro, si consiglia di utilizzare un panno umido e morbido. Asciugare successivamente con un panno morbido ed asciutto. Per una pulizia più approfondita delle parti in vetro, è possibile utilizzare i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente.

VETRO TEMPERATO

Per una normale pulizia delle parti in vetro temperato, si consiglia di utilizzare un panno umido e morbido. Asciugare successivamente con un panno morbido ed asciutto. Per una pulizia più approfondita di queste parti, è possibile utilizzare i prodotti specifici normalmente reperibili in commercio tenendo conto delle indicazioni del produttore e facendo molta attenzione a non entrare in contatto con le superfici di materiale differente. Il vetro temperato va maneggiato con cautela! Danni sul bordo o scalfi sulle superfici possono causare la rottura improvvisa del vetro. Tuttavia il vetro non forma mai schegge affilate: si rompe in piccoli pezzi.

CARE AND MAINTENANCE.

FABRIC

For details on the composition, maintenance and cleaning of the fabric, see the fabric sheet or the label on the product.

Warning! When using fabric cleaning and maintenance products, follow the instructions given on the container. For the fabrics washable in water, washing at specialized laundries is suggested. Never use alcohol or other solvents. Avoid direct contact between the fabric and heat sources, keeping a distance of minimum 20-30 cm. All materials, including those of the highest quality, may be subject to colour changes, particularly if exposed to bright sunlight. It is best not to expose the material to direct sunlight. Warning! When used to the same extent, fabrics that cover soft surfaces are subject to greater wear than those covering rigid surfaces. Warning! Due to its nature and the treatment undergone, not all stains can be removed completely from the fabric.

LEATHER

In order to maintain the original features of leather covers regular cleaning and care treatments are necessary. Clean regularly with water and neutral soap and then apply a coating of nourishing cream on the entire surface of the same, as the cream acts to saturate the leather and delays stain absorption. Do not use microfibre cloths as they may remove the grease and damage the leather itself. We recommend to use nourishing cream once or twice a year (or whenever the leather appears to be dry). To remove stains use a cotton cloth. Do not rub. Press the cloth against the stain to absorb. Use a delicate detergent diluted in water to remove any rings.

DOWN CUSHIONS

For the regular care of down cushions, plumping up the cushions is recommended so as to uniformly redistribute down inside the lining and thus restore their original comfort.

MARBLE

Each piece of marble is unique, no two pieces are ever the same. However marble needs adequate care to protect it from stains, fading etc.

Many believe that marble is almost impenetrable. Being a very compact form of calcareous stone it is much more porous than one would think. Therefore it is liable to stain, if food or liquids are spilled on it, or any other cleaning materials, especially if left on the surface for a long time. In fact liquids or even slightly acidic substances are liable to corrode, fade or damage the marble. The best way to protect marble surfaces is to treat them as if they were made of wood. So that they should be protected from heat, or from any objects that may stain or scratch the surface. The use of table cloths and coasters and cleaning away any spills immediately is highly recommended.

Marble top surfaces are polished (natural polish). All marble tops are treated with protective waxes, however these waxes do not protect marble from

aggressive or corrosive substances. The best way to maintain the aspect of any marble surface is to use occasionally the specific liquid that we supply with the product. Avoid the use of clothes with rigid fibres which could damage and/or scratch surfaces.

ATTENTION: the protective treatment does not protect the marble from acid corrosion. As such, it is advisable to remove splashes of acidic substances, such as lemon juice, vinegar, coffee or wine, right away. Avoid cleaning the base with abrasive and aggressive products. The use of acid detergents is not recommended. Marble is a natural stone that may feature colour and grain differences that make every model unique and inimitable, and therefore unlike any other.

WOOD

For the regular cleaning of wooden parts a soft, damp cloth is recommended, which may be slightly dampened with a solution of water and neutral soap if needed. Then dry the surface with a soft, dry cloth. For a deeper cleaning of wooden parts specific products normally found in stores may be used, paying special attention to the manufacturer's instructions and taking care to avoid contact with different materials. Initially testing the product in an area out of sight is recommended. Never use alcohol or other solvents. Never use abrasive or corrosive products. Do not allow the wood to come into direct contact with heat sources and keep the product at a distance of at least 20-30 cm. Avoid direct sunlight.

WARNING: due to its nature and processing, certain stains cannot be completely removed from wood. A slight change in colour over time is considered a natural evolution of the material.

PAINTED WOODEN PARTS

For the regular cleaning of painted wooden parts we recommend cleaning with a soft damp cloth and thoroughly drying. Do not rub vigorously as this may affect the sheen of the paint. When cleaning the furniture, we always recommend you follow the grain. For the deeper cleaning of painted wooden parts, you can use specific products normally found in stores, paying special attention to the manufacturer's instructions and taking care to avoid contact with different materials. We recommend testing the product beforehand on a non-visible area. Do not use products that contain alcohol, acetone, chlorine, diluents or abrasive detergents.

Do not move the furniture outdoor and do not expose it to direct sunlight as this may irreversibly damage the painted surfaces; Do not expose the furniture to bad weather or significant temperature variations in order to prevent the undesirable deformation, shrinking and swelling of the wood; Do not use the furniture in environments with a high level of humidity, maintain a minimum distance of 20-30 cm from sources of direct heat, and keep away from damp walls in order to prevent the formation of mould and fungus, and the undesirable deformation, shrinking and swelling of the wood. Avoid exposure to direct sunlight. Do not place excessively hot (over 30°C) and/ or cold objects (less than 10°C) on the surface of the furniture as this may create a patina on the paint used to finish it. To prevent irreversible damage to the surface of the wood, do not hit the surface of the table with blunt instruments or allow heavy objects to fall on it, and do not place objects with abrasive surfaces on it. Warning: due to its nature and treatment, certain stains cannot be completely removed from the wood. A slight change in colour over time is considered a natural evolution of the material.

VARNISHED PARTS

For the regular cleaning of varnished parts a soft, damp cloth is recommended, which may be slightly dampened with a solution of water and neutral soap if needed. Then dry the surface with a soft, dry cloth. During the first few cleanings the cloth may become slightly coloured due to the varnish dust remaining on the surface. Do not use abrasive products and cleaners, acetone, trichloroethylene, ammonia, wax or furniture and cloth polishes and do not use cloths with rigid fibres (linen and synthetic) which could damage and/ or scratch surfaces. To clean these parts more thoroughly, specific products normally found in stores may be used, paying special attention to the manufacturer's instructions and taking care to avoid contact with different materials. Initially testing the product in an area out of sight is recommended. All of these operations must be performed very carefully so as not to damage surfaces. Exposure to direct sunlight may alter the colour of the varnish.

METAL AND LACQUERED PARTS

For the regular cleaning of metal and lacquered parts a soft, damp cloth is recommended, which may be slightly dampened with a solution of water and neutral soap if needed. Then dry the surface with a soft, dry cloth. To clean these parts more thoroughly, specific products normally found in stores may be used, paying special attention to the manufacturer's instructions and taking care to avoid contact with different materials. Initially testing the product in an area out of sight is recommended. Never use alcohol or other solvents. Never use abrasive or corrosive products.

CHROME-PLATED PARTS

For routine cleaning of parts with a chrome finish, we recommend the use of a damp, soft cloth which may be slightly dampened with a solution of water and neutral soap if needed. Then dry subsequently with a soft, dry cloth. To clean these parts more thoroughly, specific products normally found in stores may be used, paying special attention to the manufacturer's instructions and taking care to avoid contact with different materials. Initially testing the product in an area out of sight is recommended. Never use alcohol or other solvents. Never use abrasive or corrosive products.

MIRROR

For normal cleaning of the mirror, we recommend using a soft, damp cloth slightly dampened with water. Dry afterwards with a soft cloth. For more thorough cleaning, you can use specific products normally available on the market, taking into account the manufacturer's instructions and taking great care to avoid their coming into contact with parts made of other materials. Never use alcohol or other solvents. Never use abrasive or corrosive products.

GLASS

We recommend using a soft, damp cloth for normal cleaning of glass parts. Then dry using a soft, dry cloth. Specific, commercially available products can be used for a more thorough cleaning of the glass parts, taking great care to follow the manufacturer's instructions of use. Do not allow these products to come into contact with the other surfaces.

TEMPERED GLASS

We recommend using a soft damp cloth for routine cleaning of tempered glass. Wipe with a soft, dry cloth. To clean tempered glass more thoroughly, use commercially-available specific products, taking the manufacturer's instructions into account, and avoiding contact with surfaces made of different materials. Tempered glass should be handled with care! Damage on the edge or scratches on the surface can cause the glass to suddenly break. However, the glass never breaks into sharp shards: it breaks into small pieces.
